With Royal's Comprehensive Rebuild/Trade-In Program

Rebuild – Save 60%

Send in your old, worn-out centers today, any brand, any condition, any taper. Royal will evaluate them to see if they can be economically rebuilt. The rebuilding process includes:

- Disassembly and thorough degreasing
- All new bearings
- New coolant seal
- Point reground to original accuracy of +/- 0.0001" TIR or better
- Center lubricated with clean, fresh grease

Rebuilt centers are guaranteed to cost no more than 40% the price of new.

Trade-In – Save 35%

Sometimes it doesn't make sense to do a rebuild because the point or body is too damaged or the center is a competitive model that we might not stock the parts for.

If we determine that your center can't be rebuilt economically, we will offer you a brand-new Royal center in exchange at a 35% discount.

You may also choose the trade-in option even if your centers can be rebuilt but you wish to replace them with new centers instead.

Send In Your Centers Today!

Note — Trade-in discount does not apply for custom centers.
