

# CHUCK STOPS

- ❑ The Royal Chuck Stop provides a simple, consistent method for **locating short parts** in a 3-jaw lathe chuck.
- ❑ Captive, web-shaped design eliminates the danger of using spacers or parallels that could come loose and be thrown from a spinning chuck. Three strong magnets further secure the stop to the chuck face.
- ❑ Stop allows short parts to project past the chuck jaws, providing **clearance for facing operations**.
- ❑ Setup time is greatly reduced — no need to bore soft jaws.
- ❑ The Royal Chuck Stop is very accurate — front and back locating surfaces are parallel within +/- 0.0004".
- ❑ Slot width can be easily enlarged to accommodate wider chuck jaws.
- ❑ Anodized finish provides good wear-resistance.

## Royal Chuck Stop Sets

DESCRIPTION	CAT. NO.	PRICE
Standard Set — includes 15, 20, & 25mm stops	25200	<b>\$189</b>
